

Callaway Grading, Inc. takes the lead in parking lot replacement Community Service Project

Callaway Grading, Inc. removed the old deteriorating driveway and re-graded the driveway entrance for the Mount Carmel United Methodist Church in Hampton, Georgia.

Civil Site Services, Inc. provided 20 tons of GAB Asphalt Mix and E.R. Snell Contractor provided 6.5 tons of Asphalt.

The placement of the Asphalt was completed by Onsite Paving Sealcoating and Maintenance, LLC.

The new church driveway will enable the church membership to grow as new parking spaces are available for visitors and members.
